

Welcoming new
GRANTEE PARTNERS

to the
FRIDA-VERSE

FRIDA's Call for Applications is a magical, participatory process filled with hard work, patience, intentionality and constant unlearning and relearning which involves all members of the FRIDA community. It all culminates with the welcoming of new grantee partners— young feminist organisers from majority countries across the world, to the FRIDA-verse.

We are excited to welcome 97 grantee partners from 79 countries to join us in a beautiful and collaborative five year journey. We feel honored to co-conspire with and support young feminist collectives working intersectionally and bravely to revolutionize the world we live in, ensuring that we are manifesting in the present, the futures that we are co-creating. All of the grantee partners were chosen through a participatory process among the FRIDA community and represent the work that young feminists across the globe voted on and defined as priorities.

Join us in celebrating them! Some new grantee partners are not reflected in this document for security reasons, and we hold space to celebrate and include them and their inspiring work. They are amazing, we can ensure that! Look out for the full Zine with much more information on the newest members of the FRIDA-verse in early 2023!
